

Household Dangers for your Pet

Posted on [November 18, 2010](#) by [Graham](#)

Pet Proofing your Home

Just as parents ‘childproof’ their home, so should pet owners ‘petproof’ theirs. Four-legged members of the family, like infants and small children, are naturally curious and love to explore their environment with their paws, claws and mouths. But they can’t know what is dangerous and what is not... so it’s up to you to make your home a safe haven. The following tips can help ensure that your pet enjoys a long, happy and accident-free life in your care.

All around the house

Screen windows to guard against falls in multi-level homes.

Don’t let young pets out on balconies or high decks.

Many house plants, including Lilies/Liliaceae family, Dieffenbachia (dumbcane), Cyclamens, Philodendrons, Ivy (various species), Creeping Charlie, Umbrella Plant and many more are extremely poisonous if eaten. Remove them or put them out of reach in hanging baskets.

Rat bait is extremely tempting for dogs to eat, yet is highly poisonous and usually fatal, and should not be accessible at any time.

Puppies & kittens love to chew when they’re teething, so unplug, remove or cover electrical cords.

Don’t leave a room where a fire is lit or a space heater is being used unattended.

Plastic bags may be fun to play with, but they can suffocate.

If your pet can put something in their mouth, they probably will. Don’t leave small, sharp, easily swallowed objects lying around.

In the garage

Cats enjoy naps near a warm engine so, before you drive off, honk your horn and make sure your pet is not under or near the car.

Pets like the smell and taste of antifreeze and windscreen washer. These chemicals can easily kill your pet. Tightly cover their containers and wipe up any spills.

Paint, petrol and other dangerous chemicals should be stored out of reach.

In the kitchen, laundry & bathroom

Never leave hotplates or irons on unattended.

Dangerous household chemicals such as bleach and ammonia should be stored out of your pet’s reach.

Close washing machine and dryer lids – your pet might climb in and become trapped.

Keep toilet lids down – small pets can actually drown if they fall in.

Medicines, shampoo, sunscreen and other personal care items can kill your pet. Make sure they can’t get hold of them.

Out in the yard

Some outdoor plants, like Lilies, Ivy, Oleander, Azalea, Foxglove, Hydrangea, Morning Glory, Nightshade, Rhododendron, Yew and many more can be poisonous to pets. Many plants can also be responsible for allergies in our pets.

Keep pets away from lawns and gardens treated with snail bait or chemicals.
Store garden tools, baits and chemicals securely. Keep garden sheds locked.
Cover swimming pools, spas and ponds- your pet might fall in and not be able to get out.

Avoiding cat-astrophes

Many objects used as cat toys – yarn, string, rubber bands, aluminium foil – can be extremely harmful if swallowed.

Cats love to sleep in warm, dark places, so close drawers, trunks and cupboards – your pet might suffocate if trapped.

A cat looks adorable with a ribbon tied around its neck... but it could get caught and choke your pet.

Home for the holidays

Tinsel and icicles, Christmas tree lights and glass ornaments will be sure to tempt your pet's curiosity – but all could be lethal if chewed or swallowed.

Poinsettia, holly and mistletoe are poisonous to your pets.
