

# Platinum Performance Equine

Posted on [February 16, 2012](#) by [Graham](#)

We continue to get great reports back from people using **Platinum Performance**. The main advantage with **Platinum Performance** is that no additional vitamin or mineral supplements are required, regardless of what mix of equine feed, pasture or hay your horse is on.

As well as vitamins and minerals, **Platinum Performance** contains Glucosamine Sulphate, Omega-3 fatty acids and 19 essential amino acids – all that's required for better conditioning, maintaining or establishing proper weight and optimal performance.
